

Lefkos Papapetrou

LEAD FRONTEND DEVELOPER

lefkoss@hotmail.com

+357 97 718 781 · Nicosia, Cyprus

lefkos-portfoliov2.netlify.app · github.com/lefkosp

PROFILE

Lead frontend developer with 4+ years of experience specializing in modernizing legacy systems into scalable, maintainable React/TypeScript architectures. Currently own frontend architecture for an enterprise security platform, mentoring a small team through a full platform rewrite. Ship independent full-stack projects spanning AI products, fintech PWAs, and open-source developer tooling.

EXPERIENCE

Odyssey Cybersecurity — ClearSkies

Jun 2025 – Present · Nicosia, Cyprus

Lead Software Developer (Frontend)

May 2026 – Present

- Own frontend architecture for ClearSkies: module boundaries, shared patterns, and long-term React platform direction.
- Lead a small frontend team through mentoring, structured code reviews, and unblocking delivery while raising the quality bar.

Software Developer (Frontend)

Jun 2025 – May 2026

- Core contributor to the ClearSkies rewrite from C#/Ext.NET to React, shipping composable component systems that replaced a brittle legacy UI layer.
- Reduced developer onboarding friction and improved cross-team maintainability across the platform.

Medlo — Frontend Developer

Apr 2022 – May 2025 · Remote

- Owned frontend delivery on an internal staffing/scheduling platform for three years: shipped the original module, then layered on calendar-heavy features including an automatic shift-to-staff assignment engine.
- Wrote unit tests across the codebase and, with no dedicated designer on the team, owned UI design decisions directly — iterating 2–3 directions per feature before committing.

PrimoThePlug — Owner & Digital Strategist

Sep 2018 – Sep 2021

- Built and maintained a custom e-commerce platform end-to-end: product pages, landing flows, and conversion-optimized checkout.
- Grew three social channels and secured recurring brand partnerships through consistent content and marketing strategy.

SELECTED PROJECTS

Tweetpreneur (live) — Full-stack AI product generating a shareable business card from an X handle; Angular 19 + Express/MongoDB backend with response caching, OpenAI pipeline. 120+ cards generated. · Angular, Express, MongoDB, OpenAI

Parkit — Parking marketplace PWA built for the Bank of Cyprus Fintech Hackathon: live map, booking flow, QR check-in, realtime payments over WebSockets, vendor dashboard. · Angular, Leaflet, Socket.IO, PWA

Change Radar — On-prem CLI daemon watching git repos for risky changes (SQL migrations, contract diffs, sensitive paths), posting prioritized Slack digests. SQLite-backed, Dockerized, Vitest-covered. · TypeScript, Node CLI, SQLite, Docker

FormForge — React form component library: 15+ composable, typed field components behind one declarative schema API, with a live-preview docs site and visual form builder. · React, TypeScript, Design Systems

SKILLS

CORE

TypeScript, React, Angular, Next.js, JavaScript (ES6+)

PLATFORM

Node.js, REST, WebSockets, CSS/Sass

DELIVERY

Jest, Vitest, Playwright, Git, CI/CD, Design Systems

EDUCATION

Computer Engineering — University of Cyprus

2018 – 2021 (not completed)

- Left in the final year to pursue frontend engineering full-time; self-directed since via project-based learning (Udemy: JavaScript, HTML & CSS).
